

INTEGRATED DISEASE SURVEILLANCE PROGRAMME (IDSP)

Achievements during 2023-2024

- i) Integrated Health Information Platform (IHIP) is a reporting system used by IDSP. IHIP links real-time case-based surveillance, clinical data, lab data, and public health emergency data in a single platform. Under IHIP, disaggregated public health surveillance data are collected at all levels and reports are submitted in real-time.

The average daily reporting status of IHIP in Mizoram during 2023-2024 is shown below:

Indicator	Status/Progress
S Form Reporting Percentage	86%
P Form Reporting Percentage	83%
L Form Reporting Percentage	84%

- ii) IDSP publish COVID-19 Bulletin on a daily basis, with about 1515 Issues being published to date.
- iii) IDSP collects and maintains various data on COVID-19 which is trusted as the primary source of data on COVID-19 by the state. Data on COVID-19 are entered daily through IHIP.
- iv) There were 17 outbreak investigations conducted during 2023-2024.
