

INTEGRATED DISEASE SURVEILLANCE PROGRAMME (IDSP)

Achievements during 2025-2026

- i) Integrated Health Information Platform (IHIP) is a reporting system used by IDSP. IHIP links real-time case-based surveillance, clinical data, lab data, and public health emergency data in a single platform. Under IHIP, disaggregated public health surveillance data are collected at all levels and reports are submitted in real-time.

The average daily reporting status of IHIP in Mizoram during 2025-2026 is shown below:

Indicator	Status/Progress
S Form Reporting Percentage	92 %
P Form Reporting Percentage	90 %
L Form Reporting Percentage	90 %

- ii) IDSP collects and maintains various data on COVID-19 which is trusted as the primary source of data on COVID-19 by the state. Data on COVID-19 are entered daily through IHIP.
- iii) There were 15 outbreak investigations conducted during 2025-2026.
- iv) Health Facility Preparedness Assessment (Mock Drill) conducted twice – June and September 2025
- v) Public Advisory issued on Covid-19, Influenza and Rat Infestation
- vi) Logistics (PPE, face Mask, VTE etc.) distributed to Health Facilities
